. . . Wisconsin and West Virginia. Frontier currently provides phone, video, Internet and broadband services to more than 2 million customers in 24 states, including 11 of the states that are part of the agreement announced today. The Verizon properties include approximately 4.8 million access lines, with 1.0 million High-Speed Internet customers, 2.2 million long-distance customers, 164,000 DirecTV customers and 69,000 FiOS video customers.

In Michigan, the Verizon properties include 195 local exchange areas throughout the Lower Peninsula with 507,462 access lines, as of December 31, 2008. Along with Frontier’s 14 current Michigan local exchange areas, exclusively in South Central Lower Michigan, the new Frontier will have approximately 526,000 access lines in Michigan and its Michigan properties will compose 7.5% of all of Frontier’s access lines, nationwide.

Ivan Seidenberg, chairman and chief executive officer of Verizon, said: "We expect that this transaction will benefit customers, employees and shareholders. Customers can count on continued high levels of service and innovation from Frontier, which will bring its laser focus on the needs of rural customers to these operations. Plus, Verizon and Frontier will work to ensure that the employees in these states, who have performed outstanding work for our customers for many years, will have a smooth transition of their employment to Frontier."

According to Maggie Wilderotter, Frontier Communications Chairman and Chief Executive Officer, "This is a truly transformational transaction for Frontier. With more than 7 million access lines in 27 states, we will be the largest pure rural communications provider of voice, broadband and video services in the U.S. Frontier is committed to providing our customers with state-of-the-art technology and innovative products. We are confident that we can dramatically accelerate the penetration of broadband in these new markets during the first 18 months. We know that broadband is a catalyst for a healthy local economy and job growth."

According to Verizon, the \$8.6 billion transaction will allow Verizon to concentrate its operations around the fastest-growing parts of its business: wireless, fiber-based wireline (FiOS) and global IP (Internet protocol) networks. The transaction does not include, nor does it impact any Verizon Wireless lines or customers.
